PROFILE

Lead product designer with 14 years' experience shipping SaaS, enterprise, and consumer apps. Expert in scaling complex enterprise UX, design system governance, and AI-driven development workflows. Proven track record in driving cross-functional alignment and technical innovation at scale.

SKILLS

Research & strategy
User research & usability testing
Journey mapping & problem framing
Information architecture
Requirements specification

Product design
UI, interaction & visual design
Wireframing & prototyping
Design systems & governance
Accessibility & inclusive design
AI-assisted design and research workflows

Strategic leadership
Cross-functional collaboration
Coaching and mentorship
Stakeholder alignment & workshop facilitation
Roadmap prioritisation & experimentation

Tooling
Figma, Replit, Lovable, Cursor, GitHub Copilot, Vercel, VS Code, Sketch, Axure, Adobe suite, Dovetail, User interviews

EXPERIENCE

Atlassian — Mar 2019 - Present

Senior Product Designer | Work item view - Jira Transformation — Jun 2024 - Present

- Launched Atlassian's first AI-to-code design workflow, empowering 2,000+ employees to ship production-ready prototypes with ease, showcase during AI builders week and receiving recognition from leadership.
- Accessibility and AI champion across Atlassian empowering and coaching others in adopting best practices in accessibility and vibe coding.
- Drove concept testing for next-generation AI-driven work item experiences, that provided actionable insights shaping the future direction of Jira's work item experience.
- Led the design and implementation of 'Saved views', enabling business project admins to create, customise, and save multiple board views for their teams, exceeding adoption targets and receiving positive customer feedback.
- Led the development and rollout of the Jira UI Kit, a shared Figma library and design system resource, enhancing product quality and accelerating design workflows of makers. Used by 96 teams with 41.4k weekly inserts.
- Led conceptual direction of **Milestones** that influenced senior leadership decision making and ensured alignment of 6 teams, leading to the decision to build concept at a platform level.

Senior Product Designer | Fundamentals - Jira Work Management — May 2022 - Jun 2024

Jira Work Management (JWM) at the time was one of Atlassian's fastest growing products ever, achieving 1M MAU in 2 years & $100M ARR in 3 years.

- Delivered a customisable navigation in business projects helping 50,000+ users directly land on their desired project view. Experience was then adopted by software projects, as part of the Jira consolidation, and YourNav as part of the global navigation rollout.

- Led design on Approvals feature in business projects growing premium PEU from 0 to 23k and MRR from $0 to $185k. Experience has since been rolled out to software projects.
- Led design and direction on Overviews, allowing users to aggregate issues from multiple business projects into a single overview. At the time of deprecation (due to Jira consolidation) had 7,834 active users over 4,173 customers.

Product Designer | Data Center Mar 2019 - May 2022

- Lead product designer on the Confluence and Jira Service Management Data Center (DC) products, overseeing the web and mobile experience for admins and end users, and part of product leadership informing the future direction and roadmap of the products.
- Led design on a cross product initiative to improve performance and scale issues associated with third party apps and integrations.
- Facilitator of critique sessions for designers on DC products, improved processes and increased engagement scores from 3 to 4.5 (out of 5).
- Defined direction for Bitbucket DC, through a vision piece, informing future strategic roadmap.

ING Australia May 2016 - Dec 2018

- Lead designer on a multi-million dollar initiative to overhaul the third party, mortgage broker space.
- Lead mobile designer, overseeing all mobile initiatives, maintained a 4+ app rating across Android and iOS.
- Led design on highly used banking and money management projects e.g. change card PIN, card replacement and reissue.
- Selected from 2,355 global applicants as one of 10 Design Leads in ING's annual innovation bootcamp, finishing in the top 6 out of 350 ideas.

Suncorp Group Aug 2012 - May 2016

- Redesigned the AAMI insurance quote summary using A/B testing, analytics, and Axure prototypes to validate usability improvements.
- Designed a responsive web app enabling SMBs to purchase business insurance online, from Balsamiq wireframes through to interactive HTML/CSS/JS prototypes.
- Designed a responsive Workers Compensation policy app for customers across NSW, ACT, NT, TAS and WA - facilitated design workshops, wireframed in Balsamiq and built interactive prototypes for complex components.
- Led design and UI development of a strategic intelligence system for risk identification and innovation tracking - nominated for a Compass Award for Project Excellence and Leadership.
- Designed an occupation code search tool (ANZSIC) for underwriters and consultants, replacing a manual process. Grounded in contextual inquiry, interviews, and surveys distilled into personas.

EDUCATION

Master of Commerce (Extension) | University of New South Wales

Majors in Finance and Information Systems

Bachelor of Economics | University of Sydney

Majors in Economics and International Business
